# ABOUT US

**We officially exist on the market only from the beginning of 2020. However, we are hungry for success and we strive for our products to conquer the market with their innovation and unprecedented quality.**

## **Who we are?**

D2K Motorsport Cases is a father and son initiated project where both are equally Petrolheads in the full sense of the word. Father - Aleksander, a motorcycle rider for many years, who started his motorcycle adventure with choppers, currently focused on sports motorcycles. A regular visitor to European Paddocks and the owner and fan of Ducati motorcycles. Aleksander's son - Rafał, can be seen much more often behind the wheel of his drift car on domestic tracks, like on a motorcycle. A fan of 2 and 4 wheel KTM's production and Japanese automotive from the end of the 20th century, especially Nissan rear-wheel drive models.

## **What we production?**

Currently, our constantly developed offer is based on all kinds of boxes and accessories intended for motorsport. A significant part of our products is made to order with a strictly defined application and functionality.

## **What are we guided by?**

Intuition - this is the key word. Everything we create is closely related to it, of course not forgetting about the essential sense of taste and style. Each product produced by us must maintain sufficiently high quality standards that we unanimously recognize it worth a given amount.

## **Where are we from?**

We come from Poland and we've our headquarters in Łańcut. It is a small town near Rzeszów (Podkarpackie Province) famous for the Potocki family castle and the picturesque surrounding park.

## **Our advantages?**

Quality is always our top priority, to which we pay special attention. Of course, without compromising the functionality, innovation and design of every single product we create.

# PADDOCK.CASE SERIES

If you are already fed up with taking everyone with you on Trackday of dozens of suitcases, boxes, containers and packaging - Paddock.Case is made for you!

It's a one-of-a-kind multifunctional case, to which you will pack all the tools and useful things on the track, and after unfolding it (which takes only a few minutes) we get a mobile workshop and a place to rest between sessions. However, on hot days it may turn out a useful shelf for a helmet with a fan and optional hanger (also with fan) for faster drying. Built-in electrical panel also allows connection heating blankets and to top up the phone, and thanks built-in extension cord with automatic winding with a length of 15 m, we will always be within the power source's reach.

## PADDOCK.CASE BASIC

The Best choice to start a trackday adventure!

## PADDOCK.CASE PRO

If you need more space

# WHEEL.CASE SERIES

Wheel.Case is a wheel box dedicated to motorcycle racing teams. The rigid, powder-coated aluminum internal structure has an extensive energy distribution system. Each wheel is assigned its own electric panel, adapted to connect heating blankets, thanks to which the tires always have the optimal temperature. While, thanks to the built-in extension cord with automatic winding, 15 m long, we will always be within the reach of the power source. Due to air transport, the box also has removable road wheels.

## WHEEL.CASE HYBRID

Enough space for accessories

## WHEEL.CASE PRO

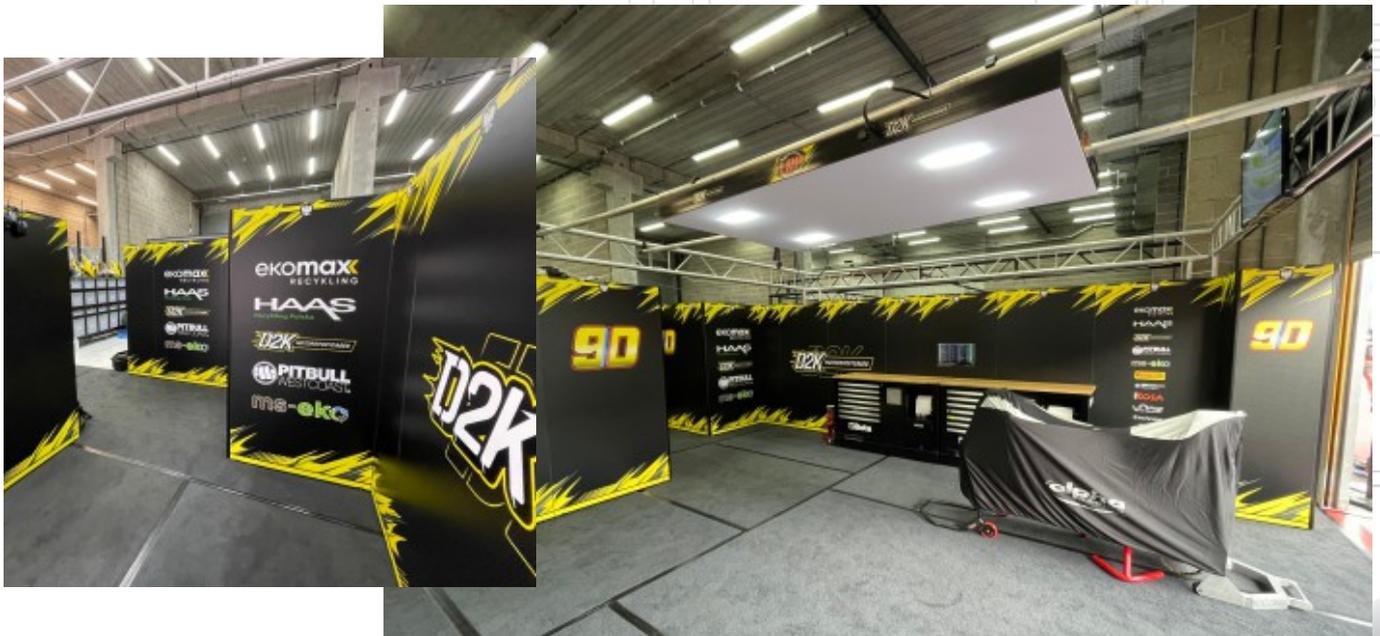

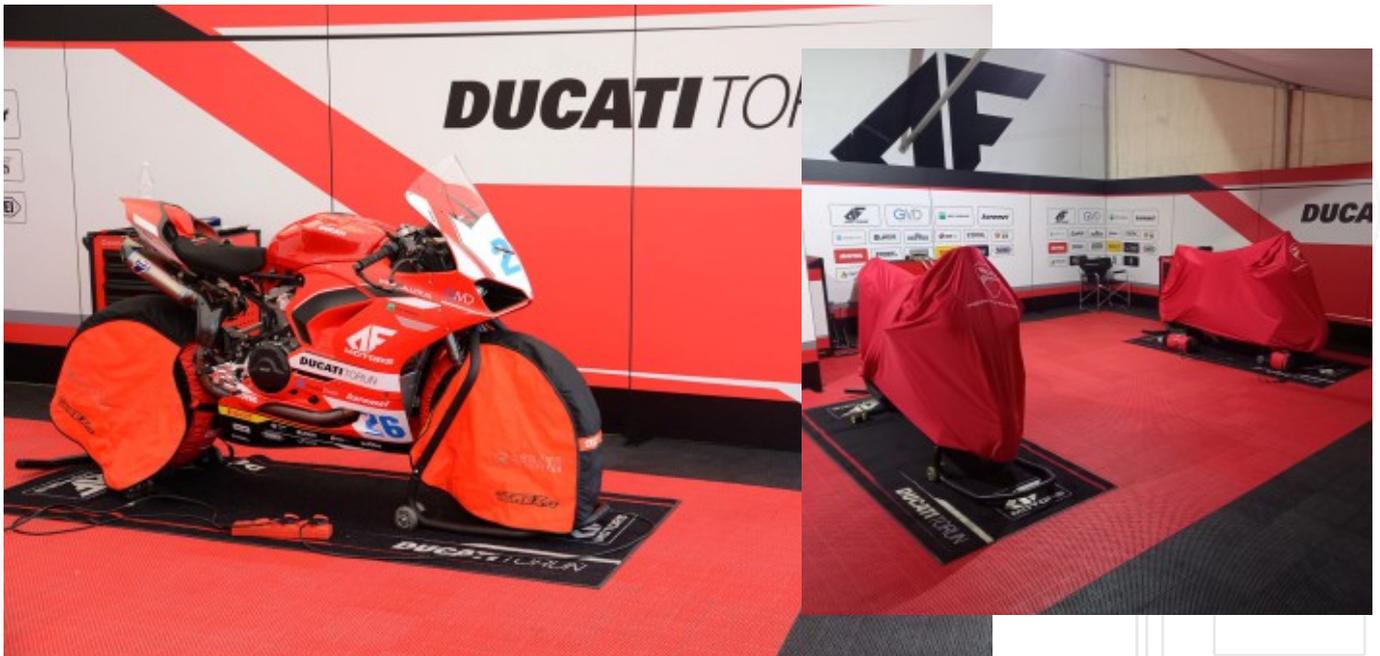

Dedicated to Racing Teams

# MOBILE SEGMENT WALL

Our offer also includes aluminum, very rigid mobile segment walls in sets with dedicated transport cases. Please contact us for details.

# CUSTOM PROJECTS

Many of our clients need tailored solutions to their requirements and needs. Therefore, to meet their expectations - we share our experience, advise, match, propose appropriate materials, draw and finally implement even the most daring projects. A perfect example will be a number of boxes and solutions prepared for teams such as LRP Poland, for example Pit-Perch with a hydraulic board ejection system or a datalogging Case/Stand for Fast Forward Racing. And that's only a examples - Think what can we build for you?
